# ABOUT THE FACTORY

Shenzhen TONLIN High-Tech Co., Ltd., established in 2009, is a company that specializing in manufacturing, design and selling of electronic products. We focus on the product innovation and own many product patents.

The company adheres to the service concept of "Quality Service, Quality First". Over the years, it has served Sharp, Emerson, Midea, Gree and other well-known companies in the manufacturing field, and has accumulated rich product experience and high-quality supplier channels. In the field of product research and development, the company focuses on the development of smart home lighting systems, and has independent innovative products in the areas of infrared sensing, voice recognition, gesture control, radar sensing and so on.

In order to ensure the steady improvement of product quality, the company has successively established its own product processing bases in Yongzhou, Hunan and Huizhou, Guangdong, specializing in the production of various products of the company, and continuous improvement in product quality and service. Among them, the Hunan factory has obtained the national high-tech enterprise certification. Great progress has been made in product manufacturing.

Tonlinlighting products have CE, SAA, ETL, SGS, TUV, Energy Star certification. The products are designed and tested to guarantee the highest level of service to our esteemed customers. Our engineers and experts continue to work hard to make our products have the features that please customers and achieve a new performance level that meets the ever-increasing challenges.

The company have 350 employees. And provide OEM/ ODM as well as brand distribution services.

# INSIDE THE FACTORY

The modernization of process equipment and high degree of automation have greatly reduced the burden on workers.

*The LEPOTEC brand has consistently ranked among the top three sellers on Amazon.*

In order to provide you with a comprehensive understanding of our products, we invite you to visit our **B 2 B** website: <https://www.tonlinlighting.com> or our **B 2 C** website: <https://www.lepotecshop.com> to browse our product catalogs and view pictures of our under cabinet LED lighting products. products.

We have warehouses in both the United States and Italy, and through quick response to all inquiries and comprehensive after-sales service, we assist in brand promotion, transportation, and other after-sales support.

Our company adheres to strict quality control procedures to ensure the production of high standard LED lighting products under cabinets. We prioritize the customer's design vision, implement production processes that meet unique design requirements, and ultimately ensure customer satisfaction.

We are excited about the prospect of contributing to the development of new cities by providing LED lighting and LED motion sensing lights.

# ***PRODUCT TESTING***

A quality test is carried out on each product before it leaves the factory.

# WAREHOUSE

Each item will be neatly organized for shipment.

# ABOUT OUR PRODUCT

## Why you need a Closet & Under Cabinet Light?

Many homes and dormitories don't provide adequate lighting, so

additional, easy-to-install, and unobtrusive lighting is in demand. We found the perfect solution in hand wave activated, under cabinet lighting. It's virtually invisible when installed, fully illuminates the area, and doesn't require any wiring or hard-to-find switches. It's ideal for renters, students, or anyone who wants some extra light with super easy installation.

When it comes to home improvement, Home lighting is one of the simplest and most effective ways to raise your home's value. At Tonlinlighting, we want to help you add beauty and function to your home in the easiest and most inexpensive way possible. In essence, we care about your home as if it were our own. Tonlin lighting can transform your kitchen in minutes.

## What our product use for?

Do you want to improve the entire look and feel of your kitchen in less than an hour (without the use of a magic wand)? All you need to do is install some under cabinet lighting. Cabinets block ceiling light to your counter tops, creating a shadowy no-man's land just a few inches in from the counter's edge. This space often remains under-utilized due to low visibility, and it keeps your kitchen looking gloomy.

The solution to all of these problems is simple, hidden lighting. The lights screw in (or stick on) to the underside of your cabinets, creating instant illumination. There's no wiring involved. Just plug it in, and you're set. Our lights even include motion-sensitive activation. Any time you need more light, simply wave your hand.

# ***ENJOY YOUR LIFE!***

Motion-activated under counter lights are also ideal for nighttime use. Instead of turning on the glaring overhead kitchen light, a small flick of the wrist gives you just enough light to work by without disturbing anyone else. Whether you're grabbing a late night snack or packing a lunch in the early morning, your housemates will thank you for keeping the lights low.

As if that weren't reason enough to upgrade your home's lighting, all of our products feature low-cost, energy efficient LED bulbs. This eco-conscious option will reduce your family's carbon footprint and lower your monthly electricity bill.

Tonlinlighting's product design is both simple and elegant and was created to blend into the style of any home. Our extensive portfolio includes 50+ products and providing you with endless ways to seamlessly automate your home.

## ***OUR FUTURE***

We don't wait for the future, we invent it. Our innovative culture gives our people the freedom to dream up "the next big thing" that will add value to your business. Or make your customers' everyday lives, a little bit better.

In the future, the company will intensively work in the field of smart home and smart lighting, continue to develop and produce better products, provide better services, and contribute wisdom and strength to the advancement of social science and technology.

# KITCHEN

Can be used as an ambient light to make your cooking more enjoyable.

# ***INDUCTIVE MODE***

Lights up automatically when it senses a human body approaching, needn't to find the switch in the dark.

# ***EASY TO INSTALL BY 2 WAYS***

## ***METHOD 1***

Built-in magnet on the back of light allows it to absorb on any ironwork surface.

Step 1

Step 2

Step 3

Step 4

## ***METHOD 2***

Built-in magnet on the back of light allows it to absorb on any ironwork surface.

A family of five is gathered in a modern kitchen. A woman in a red cardigan stands in the center, smiling and holding a large white plate of food. To her left, an older man with white hair is partially visible. Next to him is a young girl in a yellow dress with a white collar, smiling. Behind her is an older woman with blonde hair, also smiling. To the right of the woman with the plate is a man in a peach-colored shirt, looking up at her with a wide smile. In the foreground, there are several glasses of red wine and a bottle of beer on a table. The background shows a kitchen with white cabinets, glassware, and various jars on shelves. The lighting is warm and focused on the family.
